TSG 511 SW Stump Grinder

A new light weight walk behind stump grinder, the TSG 511 SW is ideal for small gardens and making narrow sites accessible. Its 25" width allows it to maneuver and seek out hard-to-reach stumps with easy entry through standard backyard gates.

It features a unique pivot-action base allowing the user to keep the wheel base stationary while using a smooth back-and-forth gliding motion to easily grind stumps. Its braked chassis supports machine stability. Automatic locking of the top section and simple machine control make this a simple yet durable machine to operate.

This unit is designed with a cutting height of 21" and a cutting depth of 9". Removal of unlimited stump diameters allows for complete removal of the stump.

Supported by a worldwide Dealer Network, Terex Environmental Equipment walk behind stump grinders are built with a solid chassis construction providing years of dependable service for rental companies, tree care companies, landscapers and homeowners alike.
