

EDGE TR622 TROMMEL SERIES

designengineeringinnovation

SMART, PRECISE & EFFICIENT...

litting

PRODUCT

KEY HIGHLIGHTS

FUEL CONSUMPTION 12-15 LTR/HR LITRES (3-4 USG) PER HOUR

Available in Mobile, Track or Static chassis formats.

HMI Control Panel provides easy fine tuning for accurate application performance.

Various aperture meshes, punch plate panels, fully welded punch plate drums with scrolls available.

Innovative design of feeder allows for ease of drum removal and mesh change.

Highly efficient hydraulic drive system with Intelligent load sensing.

180° Radial Conveyor creates impressive stockpile volumes

2m (6'9") X 6.9m (22'6") long drum provides excellent screening results.

The most fuel efficient Trommel available ...anywhere!

The TR622 Trommel combines high production rates with ease of use in a robust, portable and versatile screening plant that is ideal for applications such as top soil, recycling, composting and is proven in construction and demolition waste.

The TR622 incorporates impressive design features such as the 180° Radial conveyor, unique load sensing hydraulic drive system, eco-power saving functionality and a user friendly HMI control panel enabling easy adjustment to suit varying applications.

A quick drum exchange is facilitated via the hydraulic sliding feeder, enabling operators to simply lift out the existing drum to be replaced with the various drum types available.

The TR622 Series is available as a track, wheel or static chassis configuration.

APPLICATIONS

SMART, PRECISE & EFFICIENT

The TR622 Series caters for a wide range of applications, whether it is industries such as the aggregate, skip waste management or those wishing to process industrial and demolition waste. Thanks to design features such as the 22ft long drum, the TR622 is able to produce top-quality fine materials such as compost, gravel, sand and topsoil with ease. Enhanced screening results are achieved by material spending a greater amount of time in the longer drum combined with the optional high-throw aggressive screening action. The TR622 boasts a four wheel direct drive system, hydraulic variable speed control drum with forward/reverse functionality and feeder conveyor with load sensing controls preventing overload, asset damage and reduced fuel consumption.

Steep sided hopper bin sides combined with a larger drum opening and extremely wide collection conveyor prevents material bridging and spillage.

APPLICATIONS

Construction and Demolition waste
Sand and Gravel
RDF processing
Organic Waste
Topsoil
Wood Waste
Skip Waste
Commercial and Industrial waste
Green Waste
Landfill reclamation

DESIGN FEATURES

EDGE Innovate have worked tirelessly to ensure our products are of the highest quality. We only ever use parts and products that have been developed, tested and proven to provide optimal performance and reduce operating and maintenance costs. Every part is vital for uptime and performance.

HOPPER

- The TR622 Hopper capacity ranges from 7.5m³ (9.8 yds³) to 8.5m³ (12 yds³) depending on chassis format.
- Houses a 1200mm (48") wide, variable speed feeder conveyor with load sensing functions to prevent drum overload.
- The hydraulic sliding feeder enables for quick drum and mesh exchange.

6

RADIAL FINES CONVEYOR

- The 180° radial fines conveyor consists of a 1050mm (42") wide belt providing a discharge height of up to 5.9m (16'10")
- Hydraulic folding function enables for quick transfer from transport to operational mode.

DRUM (BARREL)

- The 2m (6'9") X 6.9m (22'6") long drum provides excellent screening results.
- Driven via a direct 4 wheel drive system with a variable drum speed.
- Various aperture meshes, punch plate panels, fully welded punch plate drums with scrolls are available

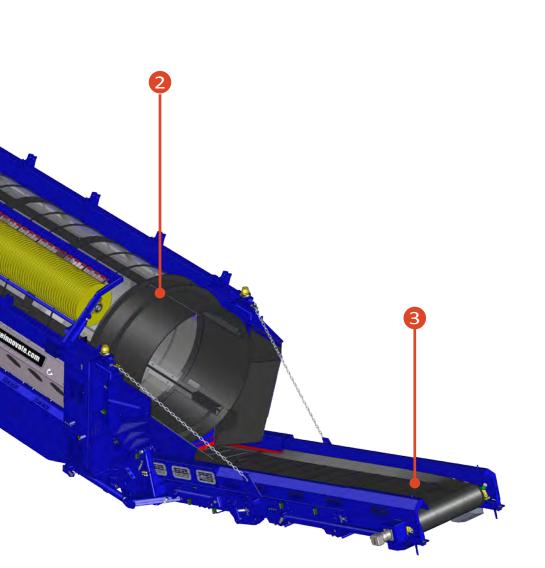

OVERSIZE CONVEYOR

- A telescopic, heavy duty 1050mm (42") wide conveyor provides a discharge height of up to 4m (13'1").
- Impact bars as standard absorbs the impact of material, prolonging the lifetime of the belt.
- Hydraulic head fold function enables for quick transfer from transport to operational mode.

CONTROL PANEL

- Interface provides easy fine tuning for accurate application performance.
- Panel displays Engine load, hydraulic temp & pressures and fuel consumption while machine is still operating.
- Automatic start-up, eco-saving idle mode and overload prevention system prevents asset damage.

REMOTE

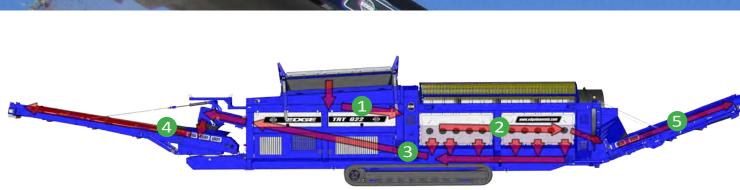

- A number of features can be controlled via the radio remote.
- Including; start/stop unit function, tipping grid with time up/down function, raise/lower front & rear jacklegs, variable engine speed, rotate radial conveyor, adjust feeder belt speed and a machine shutdown button.

POWERUNIT

- Powered by a CATERPILLAR C4.4 industrial power unit.
- Load sensing system decreases running cost with automatic shutdown as standard.
- Average fuel consumption of 12-15 Ltr/hr. (3-4USG).

STACES OF SEPARATION

Feeder

- Intelligent hydraulic load sensing system to prevent overload. Feeder belt speed varies depending on drum pressure in automatic mode
- Variable belt speed
- Belt speed can be adjusted via the control panel and remote control

Screening (Drum/barrel)

- Material is screened via the 2m (6'9") X 6.9m (22'6") long drum •
- Variable screening angle
- Variable drum speed depending on application adjusted via control panel

Collection Conveyor

- 1500mm (60") wide collection conveyor
- Carries screen material from drum to radial conveyor Ċ
- The combination of steep drum hopper sides and extremely wide • collection conveyor prevent material bridging.

Radial Conveyor

- 180° Radial conveyor with hydraulic working angle adjustment
- Discharge height of 5m (16'5") -TRM / 4.9m (16') -TRT
- Working angle adjustment via hydraulic control valve C
- Remote radial left / right function available

Oversize Conveyor

- Hydraulic telescopic oversize conveyor •
- Stockpiles oversize material from drum via it's 1050mm (42") wide belt
- Conical stockpile of 34m³ (44 yds³) - TRT / 95m³ (124 yds³) - TRM

TRACK DRIVEN

DIESEL/HYDRAULIC

TRT622

MOBILE SEMI-TRAILER

DIESEL/ HYDRAULIC ELECTRIC/ HYDRAULIC

TRM622

STATIC

HYDRAULIC

ELECTRIC

TRS622

TRT622- Track Trommel

Fully tracked for on-site manoeuvrability

Dual Power (TRM622)

TRM622 - Mobile Trommel

Mobile trommel is perfect for customers with multiple sites or for the rental market

Live Head

TRS622 - Static Trommel

Option of hydraulic or direct electric. Suitable for indoor and outdoor applications

Tipping Grid

Option of manual or remote tipping grids available with various bofor bars

Reversible Fan

Reversible fan is recommended for dusty applications such as wood chip

Diesel / Hydraulic

Cat4.4 96Kw (129HP) Tier 3 / 3B & Tier 4 Final engines available

Drum Types

Various drum types, mesh apertures, punch plates and spiral drums available

Twin deck vibrating grid

with remote tipping

function.

Lighting boards available for road towing. Must specify voltage

Double hydraulic drum cleaning brushes available for tough screening tasks

Provides operators with two running options; Diesel / hyd. or Electric/ hyd.

Overband Magnet

Overband magnet fitted to collection conveyor to extract ferrous metal

PRODUCT AND TECHNICAL SUPPORT

With our ethos of "Innovation at Work", EDGE not only persist in pushing the boundaries of design and manufacturing to produce hard working, quality machinery, we also bring that same ethos to our aftersales service in order to bring real benefits to customers right across the world. At EDGE we like to see the sales transaction as the start of a long-term partnership. Our goal is to offer the best customer support in the market for the lifetime of the unit. EDGE has reinvested and expanded our aftersales department in order to streamline and provide the customer support we believe our customers deserve.

Top Availability Our Aftersales Support Team are readily available for all our customer needs. We are just a call away, all day, every day.

Top Speed Express service parts available. No customer expects a long wait for replacement parts.

Top Priority The market rightly demands quick uptime. To make sure of this, we work tirelessly with our international couriers.

Top Satisfaction We track every despatch, keeping you informed all the way to ensure you are totally satisfied.

Welcome to our Comfort Zone...

+44 (0)28 8774 0525 www.edgeinnovate.com/spares aftersales@edgeinnovate.com

Edge Innovate's dedicated Aftersales, Spare Parts & Technical Support team, focus entirely on helping you the customer keep your machines running. We have a stock of £10m of spares in Ireland alone, along with other spare parts hubs in strategically positioned depots. Give us a call or email us today and use our stock and experience for your advantage!
